Profile

Third year BSc (Hons) Computer Science at the University of Dundee, on track for First-Class Honours, with experience across software development, programming, databases, web development and UX design. Completed a work experience placement at Workpro - gaining insight into software engineering, QA, technical support and business analysis. Seeking a year-long Computer Science placement to apply and further develop technical skills in a professional environment.

Education

Computer Science BSc (Hons) at the University of Dundee, 2025-29

Through university coursework, I have worked on a range of both individual and group projects that have strengthened my technical, problem-solving and collaborative skills.

Founder and Co-President of the Women in STEM Society.

Highlights

Modern Web Stack Development: Developed a full-stack web application as part of a four-person team, contributing to both frontend and backend functionality and integrating an external API.

Artificial Intelligence & Machine Learning: A robot navigation project using a grid-based warehouse environment. Implemented A* search to find optimal paths and used it to generate automated datasets for training and testing DQN machine learning models.

HNC Software Development at Edinburgh College: A, 2024-25

Self-Taught Advanced Higher: A (Mathematics) | **Higher:** 4 As | **National 5:** 7 As

All SQA exam results achieved during a period when I was unable to attend school due to my health.

Skills

Technical Skills

Languages: Java, C, C++, Python, SQL

Core Concepts: Object-Oriented & Multi-Paradigm Programming, Software Engineering, Web Development, Database Systems, Algorithms & Problem-Solving, AI & Machine Learning, UI/UX Design

Design: Figma | Tools: Git, GitHub

Professional Skills

Communication | Collaboration | Proactive Problem-Solving | Organisation | Leadership

Projects

InTheSea: A full stack dating website developed collaboratively by a four-person team. Built a responsive frontend and Flask backend, with integration of an external API and connected different components of the application.

Technologies: HTML, CSS, JavaScript, Flask, Python, StarLoveMatch API

Flight Path Optimisation – Dijkstra's Algorithm: A C program that models flight routes as a graph and applies Dijkstra's algorithm to determine the most efficient path between destinations, providing practical application of graph theory, algorithm design and computational efficiency.

Technologies: C

Indago: High-fidelity prototype for a motivational, study app aimed at older students. Used evidence-based methods of gamification, including point systems, badges, and progress tracking to encourage user engagement. Applied atomic design principles to create reusable components and maintain consistent styling throughout the interface.

Technologies: Figma, Pix2d

Games Like Wordle: A simple website providing a single, convenient place to access a collection of browser-based games. Deployed as a live website for personal use and sharing.

Technologies: HTML, CSS, JavaScript

Industry Experience

Technology Work Experience Placement *WorkPro, Edinburgh | June 2026 – July 2026*

Gained insight and exposure into the software development lifecycle and the day-to-day operations of a professional technology organisation by shadowing six divisions across the company.

Software Engineering: Observed the importance of identifying problems, considering different solutions and continually improving existing systems. Gained valuable insight into the increasingly important role of AI within modern software engineering.

Quality Assurance: Identified, documented and raised bugs for developers to investigate and resolve. Learned about both manual and automated testing, including how testing suites are used to check software systematically.

User Experience: Applied my existing knowledge of Figma in a professional environment with a particular focus on maintaining consistent design. Learned the importance of clear, organised documentation in maintaining that consistency.

Support: Understood how support teams prioritise tasks, use ticketing systems and adapt to client needs.

Infrastructure: Developed an understanding of the importance of communication and collaboration within a small technology company.

Projects & Onboarding: Worked alongside business analysts and saw how they connect client requirements with internal teams throughout the onboarding process.

One of the most inspiring aspects was seeing highly experienced professionals continue to learn, progress and challenge themselves. I enhanced many of my soft skills throughout, including communication, problem-solving and teamwork.

Work Experience

Mathematics Tutor *Private Tutoring, Edinburgh/Dundee | Aug 2023 – Present*

- Provide mathematics tutoring to students aged 11 to 16
- Develop customised lesson plans to suit individual learning styles and needs

Bar Staff *Hap Solutions, Scotland | Jun 2026 – Present*

- Collaborate with other team members across multiple bar and event venues in Scotland

Front of House Assembly *(Edinburgh Fringe), Edinburgh | Aug 2026*

- Ushered hundreds of audience members to their seats with enthusiasm and confidence
- Managed ticket scanning and completed front-of house reports with accuracy

Food Server *Craigie's Farming and Deli, Edinburgh | Jun 2025 – Aug 2025*

- Delivered friendly, attentive customer service while upholding cleanliness standards

Food Server *Ravelston Golf Club, Edinburgh | Jul 2024 – Aug 2025*

- Prepared and served food, home baking and drinks

Admin and Accounts Assistant *Bond Chartered Accountants, Edinburgh | Jun 2023 – Nov 2024*

- Assist in personal tax filings and documentation preparation
- Facilitate clients with queries through telephone and email

Leadership & Interests

Founder and Co-President Women in STEM *Dundee University | Sep 2026 – Present*

- Grew the society to over 50 paying members
- Established and manage the society committee, delegating responsibilities
- Organise and coordinate society events, partnering with University of Dundee and local businesses

Sports Clubs *Dundee University | Sep 2025 – Present*

- Karate – Vice Captain (2026/27): Support members of the club contributing to a positive and inclusive training environment. Liaise and collaborate with committee members
- Tennis: Regularly attend bi-weekly training sessions and participate in club activities

Café Volunteer *St Columba's Hospice Care | Jun 2023 – Sep 2025*

- Saltire 100-Hour volunteer award

Music Performance *Various | Aug 2015 – Present*

- Busked in Edinburgh city centre - singing and playing guitar (2023-2025)
- Performed in amateur musicals at the Edinburgh Fringe Festival (2015-2019)
